Let's not forget a time when Detroit saved the world... not only did Ford's Willow Run build half the B-24s used during WWII, but Chrysler built a quarter of our tanks in that conflict, and the president of GM was tapped by FDR to lead the war production effort, and was made a Lt. General in the US Army to do so! Help save a part of Willow Run as the new home of the Yankee Air Museum at [www.savethebomberplant.org](http://www.savethebomberplant.org)

*Deadline May 1st*  
**Reason #4**

**TO SAVE ROSIE'S FACTORY**

During WWII, President Roosevelt turned to Detroit to spearhead production. Ford, GM, Chrysler... and manufacturers across the nation stepped forward to "Do Their Part." The Willow Run B-24 Bomber Plant represents the great **Arsenal of Democracy** that was a major force for victory in World War II.
